Please amend the present application as follows:

<u>*In the Claims*</u>

Please substitute the following clean copy text for the pending claims of the same number, and <u>cancel claims 2-3</u> without prejudice, waiver, or disclaimer.

---

a1   1.   (Once amended) A camera, comprising:

a memory for storing at least one camera setting in association with a particular user;

a physical attribute sensor for identifying the user; and

a processor for controlling the camera according to said stored at least one camera setting in response to a signal from the sensor that indicates that the user has been identified.

---

a2   4.   (Once amended) The camera recited in claim 1 wherein said physical attribute sensor comprises at least one of a fingerprint sensor and a retinal scanner.

---

a3   6.   (Once amended) A camera, comprising:

means for identifying a physical attribute of a user of the camera; and

means for automatically controlling the camera according to stored photographic control settings associated with an identified user.

---

a4   8.   (Once amended) The camera recited in claim 6, wherein said means for identifying a physical attribute of a user comprises at least one of a fingerprint sensor and a retinal scanner.

9.   (Once amended) A computer readable medium for use with a camera, comprising:

logic for identifying a physical attribute of a user of the camera; and

logic for controlling the camera according to stored photographic control settings associated with an identified user.   .

a5 11.   (Once amended) The computer readable medium recited in claim 9, wherein the logic for identifying a physical attribute of a user of the camera includes logic for receiving input from at least one of a fingerprint sensor and a retinal scanner.

12.   (Once amended) A method of operation for a camera, comprising:

receiving a user identification obtained by sensing a physical attribute of the user; and

controlling the camera according stored photographic control settings associated with that user.

a6 14.   (Once amended) The method recited in claim 14, wherein said receiving step includes receiving a signal from at least one of a fingerprint sensor and a retinal scanner.

Please add the following *new* claims:

a7 15.   (Newly added) A camera, comprising:

a memory for storing at least one image data processing setting in association with a particular user;

a user identification sensor for identifying the user; and

-3-

a processor for controlling the camera according to said at least one image data processing setting in response to a signal from the sensor that indicates that the user has been identified.

16.   (Newly added) The camera recited in claim 15, wherein said user identification sensor comprises a physical attribute sensor.

17.   (Newly added) The camera recited in claim 16, wherein said user identification sensor comprises a fingerprint sensor.

18.   (Newly added) The camera recited in claim 16, wherein said user identification sensor comprises a retina scanner.

19.   (Newly added) The camera recited in claim 15, wherein the at least one data processing setting comprises at least one of a date imprinting setting and a compressed format setting.
